

The Carbon Chronicle

Authorized as Second Class Mail, Post Office Department, Ottawa

VOLUME 31: No. 30

ACME, ALBERTA, THURSDAY, AUGUST 7th, 1952

\$2.00 a Year, 5c a Copy

Congratulations, Ilene.

Mr. and Mrs. E.J. Martin of Coutts spent the weekend visiting at Carbon.

Mr. and Mrs. Ed Foster left on a two weeks visit to Sask. and visiting Evonne who is in training in Yorkton General hospital.

Omitted from the prize winners last week—A special prize to Mrs. C. Graham and Mrs. W. Hay for the best comic couple (very good)

Mr. and Mrs. R.J. Shaw, Sr. were weekend visitors at the home of R.J. Shaw, Jr. and attended the baptism of their granddaughter, Betty.

Mr. and Mrs. Cliff Bryngelson and sons, Garry and Ray, who have been visiting relatives at Carbon the past two weeks, left for their home in Los Angeles, California on Monday.

WANTED TO BUY—Second-hand 12 gauge double barrel shotgun, hammerless or hammer. Contact Frank E. Harris, Jeweller, Carbon, Alta.

FOR SALE—12 ft. No. 9 John Deere Combine in good shape. —Lars Sorensen. Acme.

Trade in your old watch on a Nice New "Bulova"

JACOB G. ROTT, Pastor.

Arnold Martin, who is stationed at Peace River at present, spent the weekend at Carbon.

Mrs. Woods of Sask. is visiting at the home of her brother and sister in law. Mr. and Mrs. Lred Gordon.

Mrs. Edwin Martin and children, Donna and Kenneth of Bismark, North Dakota are visiting relatives at Carbon.

Hon. Gordon Taylor was returned to the legislature, an easy winner over Arthur Roberts, his Labor Progressive opponent in Tuesday's provincial election.

H.G. Hammell retained his seat in Didsbury constituency by defeating his Liberal opponent, Lohis Schmaltz. Mr. Schmaltz did fairly well in this part of the constituency but was heavily outscored further west.

By present indications Social Credit will have 52 members in the 61 seat house with 4 Liberals, 2 C.C.F., 2 Conservatives and one Independant Socaal Creditor making up tse total of 61.

Mr. and Mrs. Arnold Moore and two sons of Red Deer and Mrs. Moore's parents and niece of Blackfalds spent Sunday at the home of Mrs. Louie Hay.

Gott., Gideon and Albert Schell. Gott. Eslinger, Karl and Ben Schuler spent two days fishing at Spray Lakes recently and report a catch of 41 lbs. of mountain trout—one weighed 10 lbs. So, fishermen, let's go to Spray Lakes the next time.

A picnic gathering of the Martin family was held Sunday, Aug. 3rd in the Carbon Park. Those attending were Mr. and Mrs. Christ Martin, Carbon; Mr. and Mrs. Clifford Bryngelson and family of Los Angeles, Calif.; Mrs. Edwin Martin and family of Bismark, North Dakota; Mr. and Mrs. Edward Martin and family of Coutts; Mr. and Mrs. Gus Martin and family of Redland, Mr. and Mrs. John Grose and family of Rosebud; Mr. and Mrs. Otto Martin and family, Mr. and Mrs. Andy Martin and family and Mr. and Mrs. A.J. Sigmund and family, all of Carbon.

Mr. and Mrs. Dan Taylor of Detroit, Mich. are spending a month's vacation with Mr. Taylor's sister, Mrs. Louie Hay of Carbon.

We were very glad to see Oscar in town the other day and he was pleased to meet all his old friends and report he feels quite a lot better.

A beautiful shower was held in the local hall on Monday evening for Miss M. Schmierer, a bride-elect of this month.

The evening was spent in community singing, piano solo by Marilyn Martin, duet by Mrs. Iris Shaw and Mrs. Lily Fox; The evening closed with "She's a Jolly Good Fellow."

accordion solo by the Harsch sisters, and "My Little Bottom Drawer" by our own Gracie Fields. One contest was held and won by Mrs. Stan Gouldie and Mrs. Albert Bramley.

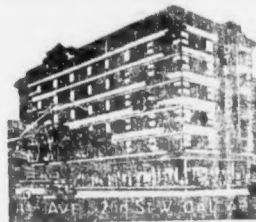

The bride was then escorted down the hall to the strains of "Here Comes the Bride" played by Mrs. Torrance. Assisting the guest of honor to open her gifts, which were held in a wedding cake, were her, mother, aunt and sister, Gail. Then a grand lunch was served by the 25 girls who were hostesses—school pals and members of the girls club of which Margie was a member.

GUARDIANS OF PEACE

The Infantry Mortar Crew...

In attack and defence, the Mortar Crew adds to the effectiveness of Infantry. Accurate, concentrated firepower is vital to successful operation in the field. It calls for cool, highly trained men to operate the many complex weapons of the Infantry.

Canada's tough, independent Infantrymen are the finest fighting soldiers in the world. At home and overseas, these young men stand in the front lines of Canada's freedom.

There are outstanding career opportunities for young men in the Canadian Army Active Force. They are career opportunities with challenges of adventure, the excitement of travel in the most important job in Canada today — defence.

You are eligible for service in the Canadian Army Active Force if you are 17 to 40 years of age, tradesmen to 45, physically fit and ready to serve anywhere.

For full information visit the Army recruiting office nearest your home.

Squats Patiently By Roadside

Coyote Becoming Like Bear
Awaiting Treats From Motorists

(By The Canadian Press)

Black bears, a grizzly bear on occasion, moose, red deer and elk are more or less taken for granted as visitors in Banff, Jasper and other Rocky Mountain centres. After all Canada is their native land and the creatures of the wilderness, theoretically at least, have a right to wander at will.

But even Banff folk have been more than a trifle surprised recently to see a coyote squatting patiently by a roadside near town, and at the same old stand, awaiting motorists who produce chocolate bars, cookies, and other delicacies. This self-elected member of the clan of mendicant bears declines to let bruin monopolize the business. He has won a lot of friends by his gentleness.

Suburban Toronto is currently seeing a mild invasion by raccoons. One of the ring-tailed fellows visited the writer's garden and goldfish pool the other day. Deserted by their mother, four baby raccoons were found atop a cold stove in a gospel hall. Residents of some parts of suburban Rosedale and Hogg's Hollow, report raccoons as "common". Garbage cans in other suburbs have been raided by the animals.

Happiest of all the memories of this Toronto observer of wildlife was a magnificent golden eagle, flying low over a valley just beyond the city limits. Even in the Canadian Rockies where such a sight is not uncommon, the close-up view has always eluded observation to some extent. But the Toronto visitor, flying west, was flying so low that the very hues of the sunset, reflected on the eagle's plumage, could be seen plainly without binoculars.

There is a Canadian rosebush that grows so near to tree size that it may reach a height of 12 feet at its tip and at shoulder height it may be close to 15 feet wide. A conservative estimate would be that it bears 500 creamy-yellow roses of exquisite fragrance.

It is a hybrid-rugosa rose named Agnes. It is a creation of the Ottawa Experimental Farm, and because of its extreme hardiness and pest-resistant qualities should be more widely known and more widely planted.

Nor should this planting be confined to gardens, for it is admirably adapted for naturalizing at the fringe of farm woodlots or for roadside decoration as it has been so successful.

Mrs. John Fisher
Puts on Blue Bonnet
— Enjoys F.N.E.!

Mrs. John Fisher puts on BLUE BONNET Margarine for F.N.E. — Flavor! Nutrition! Economy! Like the wife of the famous Canadian radio personality, you will love the delicate sunny-sweet taste BLUE BONNET adds to any food! You'll appreciate its nourishment, too. No other spread is richer in year-round Vitamin A! And you'll welcome its economy. Use BLUE BONNET for all cooking as well as on bread and toast, cut dollars from your food bills!

BLUE BONNET, Canada's fine quality all-vegetable margarine, is sold in the regular package with color wafer. Also in the famous YELLOW QUIK bag for fast easy color.

Now Many Wear
FALSE TEETH
With More Comfort

FASTEETH, a pleasant alkaline (non-acid) powder, holds false teeth more firmly. To eat and talk in more comfort, just sprinkle a little FASTEETH on your plates. No gummy, gooey, pasty taste or feeling. Checks "plate odor" (denture breath). Get FASTEETH at any drug store.

Helps You Overcome
Itching of Piles
Or Money Back

You do not have to be tortured and embarrassed by the itching, soreness and burning pain of piles any longer. Here is real help for you. Get a package of Hem-Roid, an internal pile treatment, at any drug store and use as directed. You will be pleased at how quickly your pile trouble is relieved. Only \$1.59 for the big 60 tablet package. If you are not 100% pleased after using Hem-Roid 2 or 3 days, as a test, ask for your money back. Refund agreement by all drug stores.

—Central Press Canadian.
THE LADY WINS—Snipping the tie off the neck of a policeman, Acting Mayor Mary B. Beck of Detroit, Mich., smiles the smile of victory. She and Police Commissioner G. F. Boos were in disagreement on the subject of ties on the city police force. He wanted them worn at all times; she said they should be discarded in hot weather. This picture tells the rest of the story: she won the argument.

HIGHEST WAGES

British Columbia's male farm help are the highest paid in Canada, with an average wage of \$5.90 a day.

: Western Briefs :

Big Effort

ESTHER, Sask. — Four hunters armed with rifles and a lot of miscellaneous equipment trailed what they thought was a lynx to a lonely badger hole. But the animal they flushed out of the hole turned out to be a house cat.

Eliminates Pests

RED DEER, Alta. — More than 19,000 crows and magpies were destroyed in this year's anti-predator campaign of the Red Deer Fish and Game Association.

Mennonite Conference

GREYNA, Man. — Nearly 3,000 persons from 46 churches in Ontario, Manitoba, Saskatchewan, Alberta and British Columbia gathered here recently for the 50th annual Mennonite Conference of Canada. Greytna is 65 miles south of Winnipeg.

Women Fined for Flowers

HOPE, B.C. — Two women were fined \$5 and costs under the British Columbia Dogwood and Rhododen-

dron Protection act for picking Rhododendrons in 30,000-acre Manning park near here. Mrs. M. Bidock and Mrs. D. Bennett both pleaded guilty in magistrate's court.

Oil Output Up
At Lloydminster

REGINA. — Crude oil production in the Lloydminster oil field climbed to 196,664 barrels during May, an increase of 6,876 barrels over the previous month, the Lloydminster Petroleum association reports.

May production is 34,277 barrels ahead of May, 1951, and the cumulative total for the first five months of this year, 956,926 barrels, represents an increase of 163,559 barrels over the corresponding period last year. There were 375 wells capable of production in the field during May compared to 365 in April and 271 in May, 1951.

The Swiss Alps contain at least 70 peaks more than 10,000 feet high.

Funny and
Otherwise

"I don't know whether I ought to recognize him in the city or not. Our acquaintance at the seaside was very slight."

"But you promised to marry him, didn't you?"

"Yes, but that was all."

No need worrying about finding your station in life. Sooner or later somebody's bound to tell you where to get off.

Girl (in expensive restaurant): "Why do you like the Hawaiian girls better than me?"

Sailor: "Because they would rather dance than eat!"

A Hollywood producer was filming a Biblical scene. Things were not going too well, and he raved and stormed about the studio. "Listen to me, you guys!" he shouted. "I'm paying a thousand dollars a day for this sound apparatus and I mean to get my money's worth. When those Ten Commandments are broken I want to hear 'em break! Get me?"

"How on earth do you manage to save money?"

"I make it just a little faster than my wife can spend it."

"Is Jack conceited?"

"Conceited! Why, he joined the Navy to let the world see him."

"Have you any good after-shave lotion?"

"Yes. Here's a number that drives girls crazy. It smells like money."

She: "You're the nicest boy I've ever met."

He: "Tell that to the marines."

She: "I have — to dozens of them."

"I always encourage my husband to recline in an easy-chair and put his feet on the mantle-piece."

"Why?"

"When he goes to bed there is usually some small change in the chair."

Insurance agent—But why won't you insure the clock in this policy? You say it's valuable.

Office boss—Waste of money. It'd never get stolen, for the staff never take their eyes off it.

He: "I can see good in anything."

She: "Can you see good in a movie theatre when you first go in?"

MACDONALD'S
Fine Cut

To Cope With Sudden Air Attack U.S. Builds Electronic Interceptor

By ANDREW R. BOONE
(CPC Correspondent)

The first air strike against North America in any future war may be sprung with startling suddenness.

Military men in Canada and the U.S. say that an all out, slam-bang atomic attack on 16 major United States cities and probably one or two Canadian, may be the opening of World War III.

The attack may come from several directions, at several altitudes, on any target city. It may come at night, on a holiday or in the traffic congestion of late afternoon.

The problems involved in such an attack are unquestionably being studied by shrewd, potential-enemy military minds.

The continental defence experts are planning just as carefully the methods of stopping such a blow. For, if completely successful, the war potential of North America would be reduced to zero.

U.S. Air Force defense strategists sought a continental bodyguard with these problems of attack in mind—a stay-at-home airplane which could seek out the enemy at night or in any weather, and deliver a lethal blow without the pilot ever getting as much as a glance at the foe.

The day of electronic defense in which the pilot of the defender plane merely "goes along for the ride," is close at hand as the F-86D continental defender rolls out in production quantities at Los Angeles' North American airplane factory.

To understand the F-86D and its role as a continental bodyguard, you must first grasp what it is capable of doing for defense.

From a standing start, this nine tons of metal and electronic gear—actually a piloted missile—can stand on its tail and roar into the purple canopy of extreme high altitudes.

The enemy may be far up there at an altitude which could exceed nine miles. There the air is thin and human bodies can function only by living in a plastic bubble like a goldfish.

There a man must be fed oxygen and held rigid in a full length corset-like suit to keep his own internal pressure from exploding him like a bomb in case he should lose the pressure in the plastic bubble.

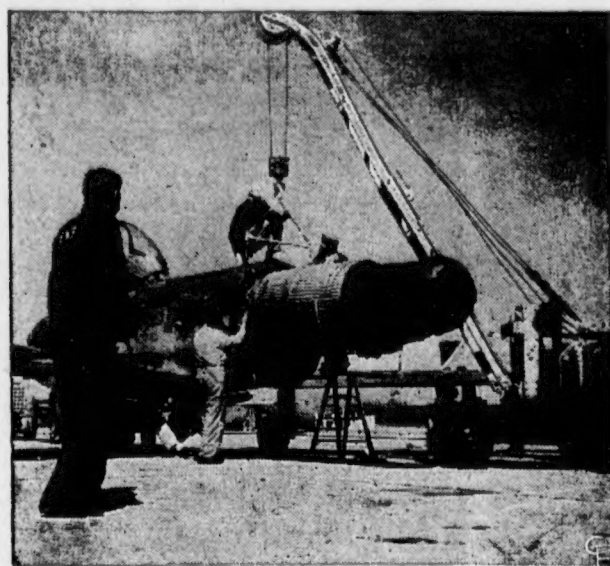

Enemy planes will be seen as "blips" or black smears, on a ground radar screen. They will have no identifiable shape, but will look like pencil marks. Pilots of the F-86Ds will roar away into that area of sky where the "blips" are seen, their own powerful radars groping for them with streams of electrons.

Each F-86D, or a number of them, will be assigned to one "blip", and once this particular one is found by the radar dish, the dish locks its electron beam on it like a terrier on a rat. From this instant electronic devices take over and the enemy is stalked.

The closing rate may exceed 1,000 miles per hour, and the contact will be over quickly. Much quicker than a hunter can swing a 12-bore on a partridge, 24 rockets, each capable of bringing down the world's biggest bomber, will hightail it after the enemy.

Travelling at over 2,000 miles per hour as the missiles strike, the enemy pilot will have little time to evade the rocket barrage from the time it is fired until it hits.

The best defense against the F-86D is another airplane. However, existing enemy fighters do not have range enough to protect the enemy bomber bound for a strike against inland North American cities.

A Starfire is Readied for Trial

—Central Press Canadian.

The defender is a high-altitude interceptor, and the only one-man interceptor. It was the first jet plane to fire an air-to-air rocket.

Its pilot, in fact, can select five different ways of finding his way home by electronic means.

Besides the electronic equipment to aid the pilot in bringing his airplane and himself back to base safely, the "D" is protected completely from weather hazards. A 20-pound refrigeration unit can cool the 500-degree heat of the jet engine (hot enough to melt lead) to a frigid 32.

Somewhat like drawing his bath-water, the pilot can mix cold and hot air for comfort in the blazing heat of the western desert, or in the 64-degree below zero weather of extreme high altitudes.

Just as startling are figures on the heating system of the F-86D. Hot air is piped to wing, stabilizer and rudder leading edges, as well as intake leading edges, the radome and even the intake vanes of the jet engine to rid the surfaces of ice.

The tiny droplets of water are actually "boiled" off these edges and evaporated away, so they will not form ice on unprotected surfaces behind the heated portion.

Again looking at their slide rules, North American engineers have figured that the heat from this system could comfortably warm 13 10-room, 2-story houses on a 10-below zero day, with a 12-mile wind blowing.

For better control at high speeds, the F-86D Sabre is the first of the Sabre series with irreversible controls in its rudder. Only ailerons and elevators have been supplied full hydraulic power in earlier Sabres. In

the F-86D, the pilot "flies a valve," the movements of his control stick operating hydraulic valves which operate the controls.

To supply "feel" to the stick, so the pilot will not overcontrol at high speeds and rip his control surfaces off, or damage them, the pilot must force his stick against springs—called "bungees" in the trade.

North American, first to produce "milled" skins for the wings of its airplanes on a production basis, has designed scores of pounds out of the F-86D through this process.

GEMS OF THOUGHT

THANKFULNESS

Fountain of mercy! whose pervading eye Can look within and read what passes there, Accept my thoughts for thanks: I have no words.—Hannah More.

For the ability to be of service to a fellow-creature, we ought to give thanks, not demand it, since in any true act of helpfulness it is the helper who is most helped.—W. J. Cameron.

Father, we thank Thee that Thy light and Thy love reach earth, open the prison to them that are bound, console the innocent, and throw wide the gates of heaven.—Mary Baker Eddy.

Thanksgiving Day is a jewel, to set in the hearts of honest men; but be careful that you do not take the day, and leave out the gratitude.—E. P. Powell.

On The Side : By E. V. Durling

Men in the Kitchen

In Tibet, as I previously reported, some women have as many as five husbands and the husbands handle all the housework. Some Eskimo women have as many as three husbands. These husbands also do the housework. There is still another region where the husband's place is in the kitchen. That is in the Hager Mountains of the Sahara Desert among the Tauregs. The Taureg females are extremely statuesque. Average height is six feet, average weight 196 pounds. They dominate the males, who handle all the housework plus infant care. The men do the cooking and wait on the women. Husbands eat at the second table. When not at home, the wives sit around cafes smoking, drinking and gossiping. A man can't get a divorce among the Tauregs. However, a wife can put her husband out of the house and take another man any time she so desires. If a Taureg husband disobeys his wife, she can take his camel away from him and cut his food down to a minimum. The Taureg men are tall, strong and great fighters against other men. Nobody seems to know how the women get the upper hand.

Military Heel

The uniform for the women's reserve of the French army is said to be the smartest in the world. It is given credit with having stepped up recruiting by five hundred per cent. A uniform that will inspire discerning young Frenchwomen to join the army must be truly smart. An accessory is an unusually attractive handbag. During the course of originating this uniform the question came up as to whether the young women should be permitted to have high heels. An army official taking part in the discussion said: "High heels give a woman, no matter what her height, poise and self-assurance. At the same time they give her a far more attractive line." So it was decided the members of the French army's women reserve would have shoes with heels measuring one and a half inches in height.

Onions Without Tears

Do you recall some poetic lines voicing the following query: "When will the Burbanks of the glorious west create an onion with an onion's taste, but without an onion's smell?" Whether or not any of the followers of the teachings of Luther Burbank are working on that problem I cannot say. I hope so. Meanwhile, does your charming wife know how to eliminate the odor from the household when she is cooking onions? Does she know how to handle raw onions without suffering from a flow of tears? Jean Bothwell has written a book titled "Onions Without Tears". To avoid the tears, says Jean, peel the onions under a running tap. To eliminate the odor while cooking onions place a little vinegar in an uncovered pan on the stove.

And Woman Disposes

A literary celebrity of the yesteryear accepted a proposal of marriage with the stipulation that when the man became her husband he should propose to her annually. If she answered in the affirmative the marriage was to continue for another year. If she said "No," divorce was desired. She said "Yes" for five years, but on the sixth said, "No." More proof that the sixth year is the most difficult year to get by in marriage. It is said if you pass the sixth year your chances of making the silver wedding anniversary are very good. Idea of the annual proposal was, of course, to keep the husband on his toes. That could work both ways. How about the husband proposing in regular years and the wife proposing on leap year. That could also keep the wife concerned as to whether her option would be taken up.

Study Indian Migration Trails Through Tweedsmuir Park

VANDERHOOF, B.C.—Dr. Charles Borden of the University of British Columbia has only three months to complete his studies of the migration trails of the Indians of North and South America through Tweedsmuir Park. He and his associates—12 in all—are on a small island in Euche Lake in the park, 60 miles east of this northern B.C. town.

Part of that area will soon be under water. A dam, built by the Aluminum Company of Canada across the Nechako River, will flood 300 square miles of the region. The dam will provide power for the company smelter at Kitimat.

Dr. Gordon says the Indians of the Americas originally migrated over Bering Strait from Asia. These people passed through what now is British Columbia. He is attempting to find the routes.

Last summer he made a reconnaissance of the district. This June he discovered two 18th century villages on the shore of Lake Euche and from them collected more than 700 items of Indian life. He found evidence of birch bark industry, houses and villages that had been built and rebuilt far back into the 16th century, and many other items yet to be identified.

Dr. Borden's problems are money and time. The money part was solved when the Aluminum Company presented him with \$5,000 to further his work.

With Dr. Gordon are: Robert Theodorus, Roy Carlson and Natalie Burk from the University of Washington; Kenneth MacPherson and Douglas Stephen, University of Toronto; Paul Tolstoy, Columbia University, New York, and Jack Darling, Maureen Kelly and Helen Tiddington, U.B.C.

Dr. Borden's 14-year-old son Harvey, also is with the expedition as is Jack Frewell, a local resident whose hobby is archaeology.

Join Your Children In Play

Don't always be just a spectator to your children's fun if you really want to enjoy them. Join right in and have fun with them, learning as they learn, playing as they play, exploring as they explore.

Fathers seem to know this secret for enjoying children better than mothers.

But it works for mothers, too. This summer don't take your children to the swimming pool and sit on a bench beside the pool, the way so many mothers do, watching your children have fun. Get in there with them and have some of the fun yourself. Even if you don't know how to swim—you can learn.

When one of your children gets interested in a hobby, share his fun by learning something about it yourself. Instead of sitting back and saying: "That's very interesting, Johnny," let go and really let yourself get interested.

When your children ask for information, and what you can tell them on a subject is scanty, help them get the information they want instead of putting them off with vague answers. You'll be learning as much as they are, and learning is fun.

In short, if you really want to enjoy your children come down off your onlooker's perch and join them. Don't be so self-consciously a mother. Be a friend, a companion, a sharer of fun.

That's the only real way to enjoy your children, to join in their interests and to share your own with them.

The "mama" sitting beside the pool while her children swim is doing her duty, being a mother who sees to it that her children have a good time. The mother who is right in there swimming, too, is being a companion and having fun herself.

Bulls are color-blind.

STANDARD BRIDGE

♥ A 6 2	♥ Q 3	♥ J 9 7 5 4	♥ 8 7 6 2
♦ K J 8 7 6 2	♦ Q 3	♦ 9 4 3	♦ J 9 8
S.		W.	
♠ K Q 10 8 7 4	♠ A 10	♠ A 10 7 3	♠ 6 5 3

After North had bid One Heart over West's One Diamond opening, this slam was missed by several pairs in a duplicate event, through a premature bid of Two Diamonds by South, followed by an unnecessary jump to Three Spades over North's Two Hearts.

South should first make the one-round force of Two Spades, which North raises to Three. Four Clubs brings the encouraging response of Four Hearts, and South makes a second slam try with Five Diamonds—a genuine control-showing bid once the trump suit (Spades) has been agreed. North should now bid Six Spades. ♠ Q was led, taken with ♠ A, and West shifted to ♠ 8 after winning the first trump lead. In spite of the bad Heart break, the slam can be made by squeezing West in the minors.

BLACKSMITH ART FASCINATES QUEEN — As part of a busy schedule of public appearances, Queen Elizabeth watched a contestant in the horseshoe-making contest in London. The Queen appeared fascinated as the blacksmith pounded the metal into shape.—Central Press Canadian.

THE LARGEST FOREST PRESERVATION PROJECT in Canadian history is currently taking place in New Brunswick under the prosaic name of "Operation Budworm". Nineteen planes are busy spraying more than 200,000 acres of heavily wooded area in Restigouche Country with DDT in an effort to destroy the budworm infestation which is threatening valuable spruce trees in the area. The project is being watched closely by specialists from all parts of Canada and the United States. They hope that pest control in the forests will be made easier by this experiment which is jointly sponsored by the New Brunswick Government and the New Brunswick International Paper Company. In the photo above a spray-plane leaves a white plume of insecticide over budworm infested areas.

R.A.F. PLANE HITS BRITISH TOWN—With two houses demolished, firemen are shown fighting to save the 10 other houses that were set afire when an R.A.F. two-engined bomber crashed into a group of prefabricated houses at Wiltshire. The pilot and a ministry of supply official were killed, and the nine other persons aboard were injured. Note a part of the plane's engine under the firemen's ladder.—Central Press Canadian.

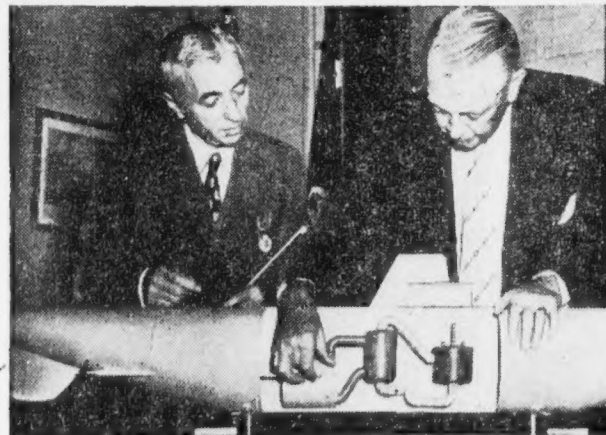

—Central Press Canadian.

GLIDING RACES — Contestants prepare to enter gliders at Cuatro Vientos airport near Madrid, Spain, where the world's gliding championships are being held. Pilots from 19 countries are participating in the various events.

PROPERLY IMPRESSED—Goggie and Debbie Pearce, two tiny tots in polio-plagued Houston, Texas, seem properly impressed as they leave an inoculation room after taking part in a mass inoculation against polio.

—Central Press Canadian.

ONE POUND EQUALS 2,500,000—Captain Hyman George Rickover, (left), designer of the world's first atomic-powered submarine, with a model of the sub, shows the arrangement of the atomic power plant, which is being inspected by Navy Secretary Dan Kimball. Navy experts disclosed that one pound of the sub's nuclear fuel will generate as much power as 2,500,000 pounds of coal or 360,000 gallons of gasoline in conventional submarines. Showing of the model coincided with presentation to Capt. Rickover of a second legion of Merit for his work on the a-sub.

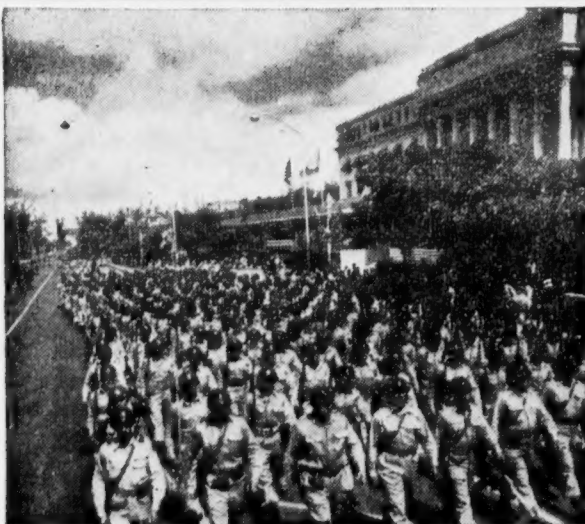

RETURNS HOME—Prof. Alexander Brott of the Conservatorium at McGill University arrived home recently aboard the Empress of Canada. The Canadian composer travelled to England to conduct the BBC's northern orchestra in a special Dominion Day broadcast which featured one of his own violin compositions.

FINED FOR TEACHING HAWK TO CATCH PIGEONS

NEW YORK—Two men were fined \$15 each for cruelty to animals after an agent of the American Society for the Prevention of Cruelty to Animals testified that he caught them teaching a peregrine duck hawk to catch pigeons.

Special agent Joseph Schlesinger said he saw Elenterio Contreras and Roland Ortiz each holding a string attached to the wild hawk's leg. A S.P.C.A. officer said it is a violation of state and Federal conservation rules to possess a live peregrine hawk.

2995

PUERTO RICANS CELEBRATE INDEPENDENCE — Puerto Rican troops march through San Juan to mark their first "Independence Day". Puerto Rico is now operating under a constitution, almost free from U.S. influence.—Central Press Canadian

NO MONKEY BUSINESS, NOW!—Susie, a Java monkey means business as she clutches her "adopted" month-old kitten and just dares anybody to take it away from her. Recently the stray kitten wandered into the home of an animal trainer in Knoxville, Tenn. Susie promptly took charge of it and will fight anyone who tries to take it from her.

FIRST AID

First Aid is just what the two words imply, namely the earliest possible intelligent aid or help given to the victim of an accident or sudden illness. This aid is usually of a temporary nature only, to be given at once, at the scene of the accident or sudden illness and before a doctor is available to assume responsibility.

SIGNS AND SYMPTOMS OF SEVERE BLEEDING

If the bleeding is small in amount but continuing over a period of days or weeks or months the victim becomes anaemic.

If the bleeding is profuse, whether it be External, Internal or Concealed the victim presents the following:

1. Weakness, faintness, collapse
2. Pallor—Cold sweat
3. Anxiety and restlessness
4. Shortness of breath progressing to 'air hunger'
5. Weak, rapid pulse

First Aid

1. In all cases the victim should be kept lying down on an incline with the feet higher than the head

2. Light but warm covering
3. Plenty of fresh air
4. Reassurance and allaying of anxiety

5. Send for the doctor or arrange for transportation of the victim in the Position of 1

6. Frequent small drinks of cool water unless there is vomiting

To Control External Bleeding

It is unnecessary to decide whether an artery or vein or both are bleeding. The only point that matters is the speed at which the blood is lost.

Direct Pressure

Method 1. (a) Elevate and hold the bleeding part above the level of the heart.

(b) Apply a firm pad of any clean material that is available and bandage firmly in place.

(c) Keep the victim quiet and watch carefully.

(d) If the bandage rapidly soaks with blood—"reinforce" it with additional pads and bandage in position.

(e) If it continues to rapidly soak with blood, send for a doctor or arrange for quick transport of the victim to him.

Method 2. (f) Apply finger pressure to "Pressure Points".

A "Pressure Point" is the point through which the main artery can be blocked by pressing it against a bone. Learning the Pressure Points is good mental exercise but often of little or no practical value, as fingers rapidly tire, the artery tends to slip away from the pressure and, most important, the other arteries in the wound may continue to bleed. The Pressure Points most useful in the control of bleeding and the techniques to be used are as follows:

(A) A Large Artery (Subclavian) passes from behind the joint of the breast-bone and collar-bone over the first rib thence into the armpit. It supplies the shoulder and upper limb with blood. To apply digital pressure to this artery incline the head toward the injured side and press deep down behind the collarbone. Thus the artery will be compressed against the rib closing off the blood supply.

(B) The Main Artery to the Arm (Brachial) may be located mid-way between the armpit and the elbow along the inner side of the arm and behind the biceps muscle. The artery may be compressed by grasping the arm firmly with the fingers over the pressure point, and the thumb on the outer side of the arm. A tourniquet may also be applied at this point.

(C) The Main Artery to the Leg (Femoral) passes over the pelvic bone in the fold of the groin approximately mid-way between the inner side of the thigh and the outer side of the hip. The pulse may be felt at this point.

To apply pressure the victim must be lying down with the foot elevated. Press firmly with the heel of the hand over the artery, compressing it against the pelvic bone.

(D) The Femoral Artery continues down the inner side of the thigh. Approximately two thirds of the distance from the groin to the knee it passes behind the leg to the back of the knee joint. In the upper third of the thigh the artery is deeply imbedded in the thigh muscles. In this area it may be compressed against the thigh bone by the use of a tourniquet, but not merely by finger pressure.

If bleeding cannot be controlled by either Method 1 or Method 2 the First Aider must resort to a Tourniquet.

Method 3. Tourniquet

A tourniquet may be used to control profuse bleeding in injuries of the limbs (arms and legs) but is of no value in wounds of the scalp or the trunk.

A tourniquet when improperly applied, or left unattended, is a dangerous instrument. The amputation of a limb may be the result of its misapplication or neglect.

The tourniquet is a much overrated First Aid tool. However, when necessary it must be applied quickly, in the correct place, and be tight enough to control the bleeding.

It must be loosened or released every twenty minutes so that the tissues of the limb may be kept alive. If the blood supply is cut off for an extended period of time, gangrene may set in and amputation may become necessary.

Proper selection of materials is important. If a cord, wire or other narrow material is used, important body tissues such as blood vessels or nerves may be so damaged that paralysis or other serious injuries could result.

A tourniquet should be made from a broad, flat band and never from a piece of wire or rope. Excellent tourniquets may be improvised from such articles as a triangular bandage folded to a narrow cravat, a stocking, tie, scarf or even the inner tube of a bicycle. A pressure pad should be placed directly over the pressure point. The pad may be a roller bandage or a similar object provided it is not too hard, such as stone or wood. There must be no sharp edges to cut into the skin. A double knot tied in the centre of a narrow bandage will serve the purpose.

Application
The tourniquet must be applied "above" the bleeding wound—between it and the heart.

Place the band over the pad, carry it twice around the limb, and tie a half knot. Place a stick about six or eight inches long over the half knot and tie a full knot over the stick. Gradually twist the stick until the haemorrhage is controlled. Do not apply any extra turns of the stick but secure it in position with a second bandage.

When a tourniquet has been applied the First Aider should fasten

World Happenings Briefly Told

British and French technicians have devised a plan to relay electric power across the English Channel by submarine cable, the British Electricity Authority said.

An 1839 postage stamp with envelope discovered recently in Spittal-am-Drau, Austria, is genuine, and therefore the oldest known stamp in the world, a committee of philatelists announced.

The Panna diamond mining syndicate claimed a 229-carat "green" diamond—believed the biggest mined in India this century—had been found near Rewa, central India. It's about the size of a pigeon's egg.

The museum in Vancouver had a visitor who may have a grudge to settle. The caretaker reported a case had been forced open and missing were a pair of English flint-lock duelling pistols, along with a Japanese sword.

Gordon L. Larion of Brantford, Ont., will think twice before smoking while driving again. The ashes from his cigarette blew in his eyes, blinding him and sending his motor car crashing into a hydro pole. Damage \$150.

Doug Moore, St. John's, Nfld., who gained his private pilot's licence at an air cadet inspection, later had to make a forced landing in a small plane. He brought it down in a potato patch about 175 feet long, and the only damage was to the propeller.

A tag on to victim where it will be readily seen. Write or print on the tag "Tourniquet applied—4:20 p.m.". The correct time of application is important. If no tags are available the victim's forehead may be marked with "T" and the time of application, i.e. T—4:20 p.m.

Again—the tourniquet should only be used when all other methods fail.

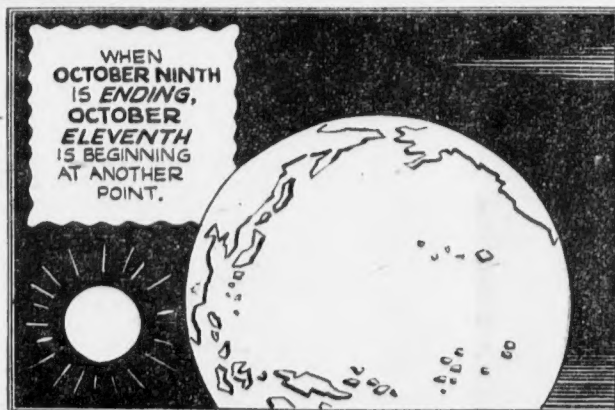

Weekly Tip

BURNT FOOD

If food has burnt in a pan, shake soda into it, fill with cold water, and allow to stand on the back of the stove until the pan may be easily cleaned.

How To Stop A Hitting Slump

It's an old saying in the "big leagues" that the reason most of the club managers have either gray hair or no hair at all is because they spend so much time worrying in case their star players will run into a hitting slump. However, hitting slumps aren't just confined to the "big leagues"—everyone who plays baseball of any kind suffers from them. So if you are having trouble with your hitting here's the inside story on how to get out of that rut.

First, check your physical condition carefully to see if it has fallen off in any way and especially check your eating and sleeping habits.

Second, give your hitting style a close check-up. Get a friend to watch you and point out any faults you have developed. Above all, make sure you are swinging parallel to the ground and are watching the ball carefully and not pulling away as you swing.

Third, keep track of how you are getting out. See if the opposition has uncovered a weak spot and if they have you should get to work and eliminate it by hard practise.

Fourth, make sure you are relaxed when at the plate. Keep those shoulders loose and concentrate on a smooth, easy swing and don't try to hit too hard!

Finally, learn how to "place your hits". Then you won't have to worry so much about good or bad luck. The record book proves that the most famous hitters of all time—the players who were rarely, if ever, bothered with hitting slumps, were the "place" hitters—the hitters who learned how to place the ball through the gaps in the infield.

The hitters who are bothered most by "slumps" are those who just stand up there and hit—no matter how hard. Thus, the next time your hitting falls off, take a tip and practise up on your "place" hitting—the odds are that it will snap you out of your slump quicker than anything else.

Concentrate on Your Own Performance

If you are competing in a track meet in any of the jumps, pole vault,

shot put, discus or javelin don't watch your opponents as they make their efforts. If you watch your opponents you may unconsciously imitate their style or you may worry about their records and bring on nervous tension. Just do your best each time and forget about your rivals as much as possible. Naturally, if you are just learning the event and you know there is an outstanding athlete worth watching you should do so and make notes afterwards on just what you saw and what you should work on.

Regularity Key to Athletic Success

On the day of a game or athletic event make sure you keep to your daily routine. Get up at the same hour you always do. If you change your hours or habits suddenly, it throws your body off, it gets a little mixed up, and as a result isn't as efficient as it should be.

Eat your meals at the same time you always eat them, if it is possible. If not, make sure you eat at least one hour before game time, and just put away what your appetite calls for.

Above all keep cool and relaxed, think positively, and make the day of a big game as normal and natural as any other day.

How about spreading the news of Sports College and helping us help every young Canadian. Make sure everyone in your district knows about the College and when to listen to the broadcast. If you wish to join Sports College, and it is only in this way that you can take complete advantage of the many valuable and helpful features of Sports College, just send a letter to Sports College, Box 99, Toronto 1, Ontario, and say you want to be a member.

LARGEST COPPER PRODUCER

Biggest producer of copper in the world is the United States, with an annual production of 960,000 tons, or 40 per cent. of all output.

Glimpse Of Canada's Northland Meant Love At First Sight

EDMONTON. — When Frank Carmichael had a glimpse of Canada's northland it was a case of love at first sight. Back in 1925, Mr. Carmichael decided to spend a season up north just to see if the country agreed with him. It seems he liked it so much, he didn't come back for 27 years.

Mr. Carmichael arrived in Edmonton recently on his way to a meeting of the North West Territories Council in Ottawa. It was his first trip out of the north since he sailed down the Mackenzie river more than a quarter-century ago.

"There have been some remarkable changes in Edmonton," the old-timer said when he took his first look at the outside world for 27 years.

His home has been Aldavik, North West Territories, on the rim of the Arctic Circle except for a few years in the Yukon.

In his years up north, he and his family have made a comfortable living trapping in the Mackenzie delta area. Their chief crop is the catch of muskrats that thrive in that region. He estimates that 250,000 pelts are taken in the area annually.

Mr. Carmichael's northern exploits also included a run-in with Albert Johnson, the "mad trapper of Rat River."

A party of Indians reported the presence of the trapper along a river a short distance outside Fort Macpherson. Intending to offer the hospitality of the Fort to the new white man, Carmichael made a friendly call on the trapper. Instead of being welcomed, he was bluntly told his solicitude was not wanted.

Ranchers Plan To Build Big Stockyard

NEW WESTMINSTER, B.C.—Announcement was made recently of plans to build one of the largest stockyards west of Chicago near here.

W. M. Mott, Liberal member of parliament for New Westminster, made the announcement on his return from Ottawa.

He said the project has been started by a group of Cariboo ranchers who are seeking land in the Surrey district across the Fraser river from here.

Construction will start as soon as the ranchers acquire the land from the department of Indian affairs.

Mr. Mott did not give details of the cost or the acreage sought for the new stockyard, but he said it will be "the largest west of Chicago."

Be sure to write plainly your Name, Address and Pattern Number.

Exciting! Our 1952 edition of Alice Brooks Needlecraft Book! Brimful of new ideas, it's only Twenty-five cents. NINETY-ONE illustrations of patterns of your favorite needlecraft designs, plus SIX easy-to-do patterns printed right in the book.

Smile Of The Week

The husband arrived home one evening and gave his wife an insurance policy.

"I've insured my life for ten thousand dollars," he said, "so that if anything happens to me, you will be provided for."

"How thoughtful of you!" beamed his wife. "Now you won't have to see a doctor every time you feel ill, will you?"

2995

WATER SAFETY HINTS

A victim of drowning, electric shock or monoxide gas may require artificial respiration. Act swiftly, lay victim face down, arms over head and face resting on fingers of one hand or on a paper. Operator clears victim's mouth then straddles victim's legs and places both hands so as to cover the victim's lower ribs. Do not press on spine. Keeping the arms straight the operator slowly swings forward to apply a gentle 2 second pressure. The operator then sits back and removes the pressure for a 3 second count. This movement must be repeated in a rhythmic manner until the victim breathes regularly of his own accord. After starting, send for a doctor and also get the victim wrapped in blankets. Do this without interrupting the artificial respiration. For further detailed information, ask your Red Cross branch or your local paper.

Kitchen Meditations

By JANE DALE

HOLD ON, SUMMER!

Hold on, Summer! Don't flit away so fast.
A day seems hardly started when, lo!—it is past.
The flowers in the pasture come and swiftly go.
Hold on, Summer. We'd have you stay, you know!
Hold on, Summer! There is so much to do
Of joyous adventuring, the whole day through!
The birds in the treetops sing briefly—then away.
Don't rush, Summer! Just linger while we play!

ODDITIES In The News

Here's an evangelist's helper who hits the bottle in a moral way. "Converted" liquor bottles are part of the evangelist equipment used by Rev. Curt Emmons of New Albany, Ind. They form a musical instrument played at the service by his 20-year-old daughter, Ethel. She taps them with wooden sticks to bring forth a ringing sound.

This is the kind of fish story that drives traffic authorities mad. A fisherman standing on a bridge at Newbury, Mass., slipped an eel over his shoulder into a passing car. The driver, just as mad as the fisherman, moved several yards before stopping as the man yelled: "Come back with my fish." More than 2,300 automobiles were held up while State Trooper Peter J. Murphy untangled the eel.

Mrs. Viola Devivi, a pretty, 23-year-old waitress in Morange, Va., has finally pocketed—and banked—a phenomenal \$531 tip left her recently by a mysterious stranger. Police took over the money after Mrs. Devivi found it under a customer's plate the night of June 18. But they were unable to locate her benefactor and reported there were no cases on file of lost or stolen money.

A \$1,000,000 estate was left by an elderly man who had one patched suit and cooked his own meals, it was disclosed here. The disclosure was made in the filing of the will of Ralph George Baldwin, 80, in Probate Court at Kansas City.

Mrs. Raymond Kenrick of Fort Worth, Tex., cut open a tomato she bought at a market and found in the middle a well-formed strawberry.

ANSWERS TO QUICK QUIZ

ANSWERS: 5. About \$20,000,000 a week. 3. Brazil. 1. Pulp and paper mill employees. 4. Prince Charles, the Heir Apparent. 2. In the State of Minnesota.

(Material supplied by the editors of Quick Canadian Facts, the handbook of facts about Canada.)

Today is yesterday's pupil.

Quick Canadian Quiz

1. What group of industrial workers receive highest weekly earnings?
2. Where is the source of the St. Lawrence River?
3. Our foreign trade last year was greatest with which of these five countries: France, New Zealand, Brazil, Japan, Sweden?
4. Who, born in 1948, holds, among other titles, that of Great Steward of Scotland?
5. Ottawa's social security taxes (for family allowances, pensions, etc.) amount to how much per week?

:: APPETIZING RECIPES ::

A flavorful pork loin roast, gaily decorated with spiced crabapples on pineapple slices makes fine fare for Sunday's dinner. Serve it with candied sweet potatoes, a green vegetable, hot rolls and a green salad for a pleasing texture and flavor combination.

Roast Pork

Allow 1 1/3 to 1 1/2 lb. meat and bone per serving. Have the back bone sawed off a pork loin, so that it may be easily carved when cooked. Mix 1/2 cup brown sugar, a dash of ground cloves, 1 tsp. vinegar. Spread evenly over pork roast. Roast at low temperature, 325 degrees F., fat side up in an open pan allowing about 35 minutes to the pound, or until meat thermometer registers 185 degrees F. Make sure the meat is well cooked. Pan-browned potatoes are an easy accompaniment. Boil the potatoes in

their jackets until almost tender, but not thoroughly cooked. Remove skins and roll each hot potato in the brown drippings in the roasting pan. Let the potatoes finish cooking with the roast. When cooked, lift roast and potatoes onto a heated platter.

To make brown gravy, allow 4 tbsp. drippings and 3 tbsp. flour for 2 cups milk or water. Stir with a broad spatula to scrape the pan and mash out lumps. Season well. Serve with a green vegetable, hot rolls, and a green salad.

B.C. Fruit Crop Greater This Year

OTTAWA.—All B.C. fruit crops will be considerably greater this year than in 1951, Dominion bureau of statistics reports.

The B.C. apple crop is expected to exceed last year's by about 1,700,000 bushels, but will be smaller than in 1949 or 1950. Ontario and Quebec expected smaller crops than in 1951, but an increase is expected in Nova Scotia.

McIntosh apples will be in light yield in Ontario but are expected to yield well in B.C.

Large total crops of soft tree fruits are expected in Canada, with B.C. showing increased production while Ontario remains about the same as 1951.

The B.C. strawberry crop will total about 9,510,000 quarts as compared to 7,150,000 quarts last year, while raspberries will yield 9,517,000 quarts as against 8,065,000 in 1951.

New Brunswick will have a greater strawberry crop than last year, but raspberries there suffered winter injury with the result the crop will be much smaller than 1951.

The Ontario strawberry crop has been reduced by dry weather and it is expected the raspberry crop will show a decrease. The Quebec strawberry harvest is almost complete in the Montreal area and is under way in lower Quebec.

Helpful Hints

The bark surface on rustic furniture will be kept from peeling off if it is given a coat or two of spar varnish.

To wash a soiled veil, shake it in a small jar of warm soapsuds. Rinse well by the same method and blot in a towel. Restore a crisp finish by pressing the veil flat with a warm iron between two layers of waxed paper.

When you do not have a cedar closet, wipe the woodwork and the shelves of the clothes closet with cedar oil when cleaning, repeating this process from time to time.

Place the article, if the colors are fast, in cold water, blued but not deep, and then add the juice of one lemon. Boil for about thirty minutes; rinse in cold water and hang in the open air to dry.

Canadian Fashion

(Women's Wear Bureau Photo)
Checked wool in this Canadian-made coat from Sanders and Gold has a belt worn halfway cinching the waistline front, allowing the full back to swing loosely.

VIRGIL

By Len Kleis

OUR COMPLETE SHORT STORY —

Minerva and the Lilliputians

By ELAINE FRANCIS

:: Being a Baby Sitter
Would Be Wonderful.

MINERVA MILLER sat in her dowdy rented room, reviewing the past three weeks since poor papa (and his annuity) had passed away. She needed a job, but, so far, her sixty years and fragile air had brought defeat. Why, I can't even be a cleaning woman, she thought ruefully. Yet there was only a dollar and twenty cents to last until her tiny monthly cheque arrived.

But loneliness was worse than hunger, she decided, staring out at the bleak sky. Until now, she had had papa to care for, and no matter how irascible he might be, thundering complaints were preferable to this absolute silence. It was thirty-five years since papa, having lost most of the Miller money in bad investments, had taken to bed with a self-diagnosed bad heart, and proceeded to absorb Minerva completely.

Only once had Minerva been briefly angered by this paternal tyranny. That was when he called Joe Cuvens worthless and made her break their engagement. Joe had been successful in business and in siring a large family. That made Minerva envious. Always she had loved children. Crinkly babies, bold little boys, solemn young misses. If it were summer, she thought, I could watch the toddlers in the park and forget my worries. Months of sitting in this dreary room. But it had been kind of the mortgage company to find a place for her when they took the house for delinquent payments. And it's no good brooding, she thought, jumping up.

It was blustery outdoors and by the time she had pushed across the bridge, she was cold. Gratefully she stepped into the stuffy library, going to the reading table with its racks of newspapers. Each day it came as a

pleasant surprise that she could read three papers in their entirety. Papa had a habit of cutting out numerous items, and as he saw the paper first, Minerva gleaned only snatches of the day's news.

She opened a paper to the want-ad section. Please, she prayed, let there be something for me to do. But a discussion between two young matrons nearby drew her attention.

"You with a maid! Do you realize we had to break a dinner date Saturday because our sitter decided to go to a dance at the last minute?" one was saying.

"High school girls aren't practical, I've told you a thousand times. Week-days they're in school and week-ends they want to have fun."

"But all the older women are sewed up with iron-tight contracts. At seventy-five cents an hour, instead of twenty-five."

"Ladies," Miss Arben, the librarian, fluttered. "Quiet, please."

Minerva sat dumbfounded. Had they meant what she thought? There was one way to find out. Forcing down her shyness, she walked over to the desk. "What is a sitter?" she asked faintly.

Miss Arben sniffed. "That's all they talk about these days. It's someone who stays with children while the parents are out."

"Don't you have to have special training in baby care?" Minerva gasped.

"I should say not," Miss Arben replied. "All they want is someone in the house while they run around to parties."

It seemed too good to be true. "Imagine me being allowed to take care of children and getting twenty-five cents an hour," Minerva cried. "Don't be crazy. Charge seventy-five. You heard..."

"Oh, I couldn't," Minerva protested. "I..."

"You'll charge at least fifty," Miss Arben interrupted. She patted Minerva's hand gently. "You have such a kind face, I'll be glad to recommend you. Mothers are always asking me if I know a good sitter and I can line you up steady. All the children you want."

Minerva knew she was going to cry. It was awful making a fool of herself in front of Miss Arben who was suddenly so friendly, but there was no controlling the tears. More than the money it would mean to buy sufficient food was the fact that she, Minerva Miller, would be feeding and washing chubby children, even holding them on her knee as she had so longed to. Being a baby sitter would be wonderful, she thought, and smiled through her tears.

(Copyright Wheeler Newspaper Syndicate)

Do You Know That...

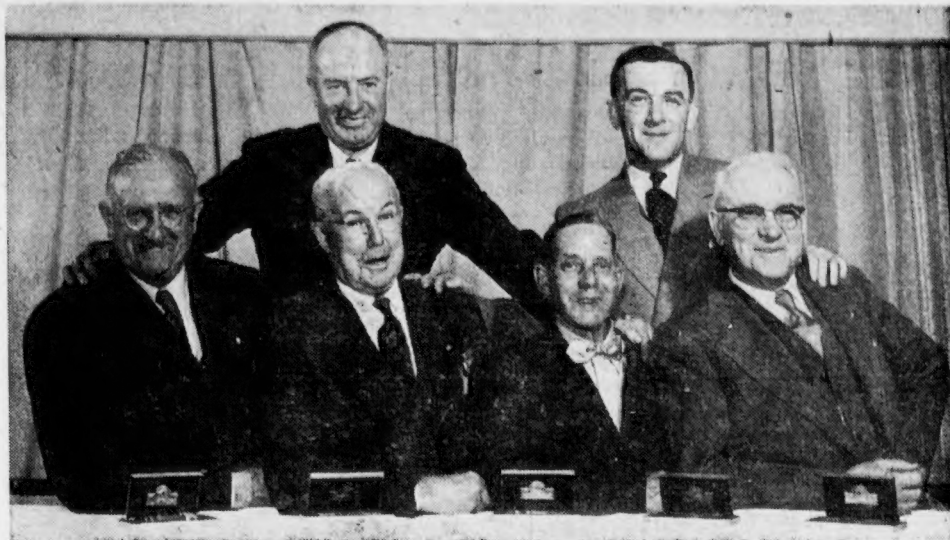

Through muscular action, water-fowl can bring the filaments of their feathers together so tightly that water is unable to penetrate them. It is not the oil on the feathers that makes them waterproof.

THE TILLERS

400 Become Members E. B. Eddy 25-Year Club

Four men who have piled up a total of 223 years of service were among 400 who received gold watches, gold pins and membership certificates as the E. B. Eddy Company inaugurated its Quarter Century Club recently at Hull, Que. The 400 original members represented more than 13,000 years of employment in the

firm's fine and specialty paper mills at Hull and Ottawa. Front row, from left—W. J. Kane (50 years); J. F. Taylor, vice-president (71 years, believed a Canadian long-service record); Elie Gratton and William J. Mills (51 years each). Back row, from left—W. S. Kidd, president (also a 25-year man), and A. Welch, general manager.

SELECTED

Recipe

PARTY CHEESIES

Savory hot morsels guests will enjoy—cleverly inexpensive, too.

3 cups once-sifted pastry flour or 2½ cups once-sifted all-purpose flour

5½ teaspoons Magic Baking Powder

¾ teaspoon salt

¾ cup chilled shortening

1 egg, well beaten

1 teaspoon Worcestershire sauce

1 teaspoon prepared mustard

½ cup tomato ketchup

2 tablespoons shredded onion

¼ cup (about) milk

49 ½-inch cubes Ingersoll processed cheese

Grease cookie sheets.

Preheat oven to 400 deg. (hot).

Mix and sift once, then sift into a bowl, the flour, Magic Baking Powder and salt.

Cut in shortening finely.

Combine well-beaten egg, Worcestershire sauce, prepared mustard, ketchup, onion and milk.

Make a well in the flour mixture and add liquids; mix lightly with a fork, adding milk if necessary, to make a soft dough.

Knead for 10 seconds on lightly-floured baking board. Roll out into a 14-inch square and cut dough into 2-inch squares.

Place a cube of cheese in the centre of each square of dough.

Moisten edges of each square, draw corners together over cheese and seal edges.

Arrange, well apart, on prepared cookie sheets.

Bake in preheated oven about 12 minutes.

Serve piping hot.

Yield: 49 Party Cheesies.

DEFORMED ROBIN

STRATFORD. —A young robin found near here has no eyes or ears. Beverly Schmidt plans to care for it until it can fly.

Canned Salmon
Price Reduced

VANCOUVER. —British Columbia packers in a move to clear last year's surplus pack from warehouses have reduced the wholesale price of canned salmon by as much as \$5.50 a case.

The new price will range from \$35 a case of 96 halves for sockeye salmon, the top grade to \$14 for low grade chums.

Warehouses hold 698,000 cases of last year's pack and the new fishing season now under way is expected to produce 1,400,000 cases.

FARM PEST

The sow thistle, one of the most troublesome of Canadian farm weeds, is a leafy-stemmed coarse annual.

Sask. Uranium Field
Open For Staking

REGINA, Sask. —Saskatchewan's Beaverlodge uranium field will be the site of the greatest staking rush in the Province's history Aug. 14 when the field will be thrown open for public staking. J. H. Brockelbank, Provincial Resources Minister, was fortifying his department for an expected 500 to 1,000 claims during the open staking period.

They're amazing good
Made with Amazing New Fast DRY Yeast!

JELLY BUNS

Measure into small bowl, 1 c. lukewarm water, 2 tps. granulated sugar; stir until sugar is dissolved. Sprinkle with 2 envelopes Fleischmann's Fast Rising Dry Yeast. Let stand 10 min., THEN stir well. Cream ¾ c. shortening; gradually blend in 1 c. granulated sugar, 2 tps. salt, 1 tsp. grated nutmeg. Gradually beat in 2 well-beaten eggs. Stir in 3 c. lemon extract, ½ c. milk which has been scalded and cooled to lukewarm, and yeast mixture. Stir in 3 c. once-sifted bread flour; beat until smooth. Work in 3 c. more once-sifted bread flour. Knead until smooth and elastic; place in greased bowl and brush top with melted butter or shortening. Cover and set in warm place, free from draught. Let rise until doubled in bulk. Punch down dough and cut into 36 equal portions; knead into smooth balls. Brush with melted butter or margarine, roll in fine granulated sugar and arrange ½" apart on greased baking pans. Cover and let rise until doubled in bulk. Twist the handle of a knife in the top of each roll to form an indentation; fill with jelly. Cover and let rise 15 min. longer. Bake in moderately hot oven, 375°, about 18 min.

• No more disappointments because the yeast has spoiled! Fleischmann's Fast DRY Yeast replaces old-fashioned perishable yeast because it keeps fresh and full strength—right in your cupboard! For fast-rising dough and grand oven results get Fleischmann's Fast DRY Yeast to-day!

Obituaries

CHARLES PATTISON

We regret to report the death of a Carbon old timer, Mr. Chas. Pattison, who passed away Aug. 6th in Drumheller hospital.

He is survived by one daughter, Violet of Carbon; one son, Don of the Bank of Montreal staff at Wetaskiwin; one sister and one brother.

Funeral services were held Saturday at 2 p.m. with interment following in Carbon cemetery.

PATRICIA MARY GOULDIE

Patricia Mary, two months old daughter of Mr. and Mrs. James A. Gouldie of Watts, Alta. died Thursday in Holy Cross hospital.

Born in Hannah, the child had been in Calgary for the past

four days undergoing medical known treatment.

Besides her parents, she is survived by a brother, Gary, and Church, Carbon with Rev. G.B. her grandparents, Mrs. Lily Goul' Hotchkis officiating. Burial followed in Carbon cemetery.

Funeral services and interment will take place at Carbon.

FRANK READY

Frank Ready, an old-timer of the Swalwell and Carbon districts passed away suddenly Friday night at his home in Carbon.

Frank was 67 years of age and came to Alberta in 1910 from Palmer Road, Prince Edward Island.

He came to the Swalwell district in 1914 and has been in the Carbon district for the last 23 years, and retired to his home in Carbon in 1951.

His father, mother and brother passed away some years ago. He is survived by one sister whose whereabouts are not

Funeral services were held on Tuesday afternoon from Christ Church, Carbon with Rev. G.B. Hotchkis officiating. Burial followed in Carbon cemetery.

Swalwell Sports will be held on Wednesday, August 13th, a week after the Beiseker Sports.

The hail storm Friday evening, Augst 1st cut a wide swath from Wimborne south through Sunnyslope and Linden, then turned southeast through the district east of Acme and damaged crops south of Carbon.

STORK Quotations

BORN—To Mr. and Mrs. J. Barnes, a daughter, Catherine Margaret on Tues., July 29th in the Holy Cross hospital.

Level Land

Mr. and Mrs. E.A. Buhler of Lamming Mills, B.C. were visitors to the S.D.A. church Aug. 2.

Mr. and Mrs. Clarence Suelzle of Delacour were visiting with the S.D.A. church and friends August 2nd.

Mrs. Archie Roth of Banff was visiting with her parents, Mr. and Mrs. Emil Berreth of this district.

Mother McGee was visiting with the S.D.A. church Aug. 2. Mrs. McGee is staying with Mrs. Harris' children while she is attending summer school in Edmonton.

The Leiskes of this district and relatives, Mr. and Mrs. Bill Wetzel of Bentley, their mother, Mrs. C. Leiske of Lacombe and their sister, Mrs. Herman Taylor and family of Chicago spent a few days in Banff last week.

Mr. and Mrs. Roy Schaber, Mrs. Emmanuel Schaber and Elmer have returned last week from their trip to Oshawa and other places of interest. On their way back they stopped in South Dakota where many of this district at one time lived.

Mrs. Henry Riefsnyder was released from Holy Cross hospital last week after spending 2½ months there. She seems to be in improved health and enjoys being home again. Dorothy wishes to thank all for their kindness in sending flowers and cards and for visits.

THE CARBON CHRONICLE

Published every Thursday at Acme, Alberta

Authorized as Second Class Mail by the Postal Department at Ottawa

Mrs. Harry Hunt, Editor

George Wheeler, Publisher

Subscription \$2.00 Per Year in Canada or the Commonwealth \$3.00 per year in United States.

Dr. and Mrs. Everett Dick and their two daughters, Raylene and Diane spent a week visiting their parents, Mr. and Mrs. A.L. Dick and a brother, Marvin, all of this district. Dr. Dick, after practicing a year in Auburn, Calif., with his wife and family is leaving Seattle Aug. 10 by plane as missionaries to Singapore where they will spend a five year term. Dr. Dick and his associate will be in charge of the Blueberg hospital there. Their stopovers will be Alaska, Tokyo and Manila and they will arrive in Singapore about August 19. Singapore is an island 14 miles wide and 28 miles long with a population of one million. Dr. Dick has other relatives in that part of the world. Dr. and Mrs. Ralph Waddell and family are spending their third five year term in Siam. Mrs. Waddell is a sister of Mr. A.L. Dick of this district. Dr. Dick's brother in law, Dr. Miles, is serving with the U.S. Army in Korea at present.

The Level Land district is proud of Dr. Dick's progress. It seems only a few years since he attended school in this district.

Yes, Sir . . . I'm for the Alberta Wheat Pool

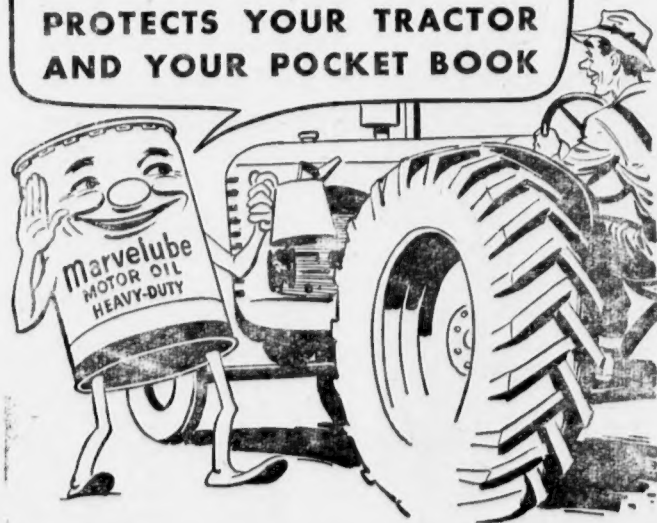

1. Because Alberta Pool Elevators give effective service and protection to all.
2. Because Alberta Pool Elevators are operating at cost and excess earnings are returned to member patrons. Over the years such patrons have received over \$5 million in cash and nearly \$6 million in reserves. Ownership rests with the reserves.
3. Because Alberta Wheat Pool and Pool Elevators are owned by many thousands of Alberta farmers who have invested close to \$8.5 million in this great enterprise. Pool members can safeguard this investment by delivering all their grain to Pool Elevators. A large volume of deliveries means low cost of operation.
4. Because the Wheat Pools are mainly responsible in keeping down the cost of handling grain. Such costs are remarkably low, probably the lowest in the world. This is a tribute to the effectiveness of farmer co-operation.
5. Because the business operations of the Alberta Wheat Pool are an "open book." Pool members may obtain the fullest information concerning the operations of their organization through their elected delegates and directors.
6. Because the co-operative principle of "each for all and all for each" is the co-operative ideal which aims at spreading economic justice throughout the nation and throughout the world.
7. Because it is of vital importance to Alberta grain producers that a strong co-operative elevator system should flourish in this province. It is essential that such an elevator system should be under the control of Alberta grain producers—the men who are actually following the occupation of farming.
8. Because Alberta Wheat Pool is the only organization in Alberta which meets these requirements.

ALBERTA WHEAT POOL

"It's Alberta Pool Elevators for Alberta Farmers"

Marvelube Motor Oil

PROTECTS YOUR TRACTOR
AND YOUR POCKET BOOK

At present day values of tractors and threatening shortage of new ones, extra engine care and maximum protection from wear is just downright good business.

Lubricates! Protects! Cleans!

Marvelube Heavy Duty is a detergent motor oil. It not only lubricates—it protects your tractor, truck or car motor by keeping it clean. A clean motor, free from gum, sludge and abrasive particles, lasts longer, performs better. Marvelube helps keep down operating costs.
